

Lubricants for R1234yf

also great for R134a, Hybrids & EVs

Snow Leopard R1234yf PAG-e now has the di-electric properties needed for electric compressors.

This means that OEM quality R1234yf-miscible double end-cap HFO-PAG46e & HFO-PAG100e may be used in:

- R1234yf systems
- R134a systems (a premium alternative to Standard R134a PAGs)
- Hybrid cars
- Electric vehicles

Workshops servicing newer R1234yf and older R134a vehicles, need just one product type (2 codes) to avoid the risk of using the wrong oil.
