

BM53000 Universal Play detector for vehicles up to 20000 kg axle load

BM
TEST EQUIPMENT

- Works on all trucks, tractors, buses and trailers.
- The BM53000 play detector is hydraulic operated equipment used for detecting play on vehicles up to 10000 kg wheel load.
- Checks steering and suspension system without jacking. Finds worn kingpin bushings, loose tie-rod ends, broken welds, loose fasteners and other failed components.
- The play detector is available in a mobile self contained package with its own frame and ramps or the two individual, hydraulically-driven plates can be flush mounted into the floor in shallow pits.
- Radio (option) handheld integrated 24 VDC flashlight and control unit is used to move the plates in different directions.

Technical data

- Sub frames dimension: 1004 x 829 x 138 mm
- Plate dimension: 1000 x 825 mm
- Control box: 760 x 600 x 210 mm
- Max. axle load: 20.000 kg
- Movement way: 100 mm total
- Moving power per cylinder: 30.000 N
- 8 movement directions (automatic centring)
- Plate speed: 36 mm/s
- Working pressure: 180 bar
- Power supply: 3 x 400 V,N,E
