

PREMIER DIAGNOSTICS

The UK's leading range of Emissions Test Equipment

PREMIER Combi

Combined Petrol & Diesel Emissions Analyser.

Designed and built by Premier Diagnostics, a British owned company based in Banbury Oxfordshire, we are renowned for being the first to introduce Cable-less Smokehead technology worldwide.

The new Combi Petrol and Diesel Emission Analyser includes the latest Cable-less Diesel DS2 Smokehead and the PDCom EOBD - our new technology sensing module for rpm and oil temperature measurement.

- Fast and easy to use test routines for increased productivity
- Colour monitor and a solid state Pc (offering the flexibility to run your own programmes)
- Fully DVSA approved to Class 4, 5, 7.HGV, PSV, RPC, SVA & LFZ meeting all current specifications and known future technology
- The Diesel DS2 Smokehead incorporates automatic calibration with every test. No more filters to lose or break
- Automatic gas bench self draining system
- The Diesel DS2 Smokehead will operate down to -15C and in all weathers with 100 metres range from its Workstation
- Designed to complement the modern MOT test station for now and the future
