

Ultrasonic testing

USX-2™ pressure leak testing system

For leak detection, and for mechanical/electrical fault finding.

Helps you to detect:

- Mechanical Wear
- Bearings, shafts, gears, cam and tappet assemblies
- Leaks in pressurised systems
- Refrigeration and air conditioning leaks and faults
- Compressed air
- Tyres
- Vacuum leaks
- Electrical discharge due to insulation breakdown
- Cracks and leaks in containers, door seals, vehicle bodywork, etc
 - USX-2 Transmitter required for this type of leak test
